days from the date of receiving review
comments.**

**ABOUT
EDITED BOOK**

Our academic and research aim is not only to publish a quality-centric book with ISBN but also to provide a strong reference and splendid foundation for research emancipation towards holistic research thereby attaining integrated knowledge development and overall nation building.

This edited book focuses on understanding various challenges in the society not only at the perspective level but also in various realms of research that are conducted towards upbringing the socio-economic and socio-technological development, which strives to facilitate the future generations to compete with excellence in innovation. It intends to congregate and upbringing innovative research and its new vistas in terms of science, engineering, technology innovation, policy initiatives, enterprise development, case studies, strategies, systems, best practices, problems, factors, challenges, etc., pertaining to research and development through genuine research findings for achieving overall development.

The proposed edited book invites original research contributions in the form of book chapters (unpublished empirical / experimental / conceptual / review / case studies) from academicians, researchers, practitioners (including entrepreneurs), etc. from diverse disciplines and interdisciplinary avenues.
